Seamless Innovation
Weaving the Future of
Healing with Sutures

Nylus®

Black & Blue Monofilament Polyamide

Product Details:

Composition	Nylon
Construction	Monofilament
Coating	None
In Vitro Retention of Strength	Although Polyamide is non-absorbable, progressive hydrolysis may cause a gradual loss of tensile strength over time because of its lack of adherence to tissue
Tissue Reaction	Nylus® suture elicits a minimal inflammatory reaction in the tissue, followed by gradual encapsulation of the suture by fibrous connective tissue
Absorption Time	Non-absorbable
Sterilization	100% Ethylene Oxide
Available in Sizes	11-0, 10-0, 9-0, 8-0, 7-0, 6-0, 5-0, 4-0, 3-0, 2-0, 0, 1, 2
Colour	Black & Blue
Shelf Life	5 years
Packaging	Box of 12, 24 & 36 sutures

Distinctive Features

- Easy passage through tissue because of low frictional co-efficient.
- Excellent elasticity.
- Knot pull strength and needle swage strength greater than USP limits.
- Packed using Tyvek paper for extra security.
- Superior cutting needles, which are excellent for use in Plastic Surgery.
- Ideal for use in skin closures.

Product Specifications

Table No. 1 NONABSORBABLE SURGICAL SUTURE - SPECIFICATION (USP)						
USP Size	Metric Size (Gauge No)	Limit on Average Diameter (mm)		Diameter maximum acceptable limit (mm)	Limits on Average Knot-Pull (except where otherwise specified) a. Tensile Strength (in N) b	Needle Attachment (in N) (Average value)
		Diameter Range in mm			Class I Min
